Kolkata, India | +916289296197 | prince08833@gmail.com | [LinkedIn](#) | [LeetCode](#)

EDUCATION

Regent Education and Research Foundation, Kolkata

August 2022 - Present

B. Tech, Computer Science and Engineering

Relevant Coursework: Operating System, Object Oriented Programming, Data Structure, Algorithm, DBMS

D.A.V. Post Graduate College, Siwan (Bihar)

April 2020 - February 2022

Intermediate (11 - 12), Science

Relevant Coursework: Physics, Mathematics, Chemistry, Hindi, English

EXPERIENCE

Coding Club Coordinator – Regent Education and Research Foundation

November 2024 - Present

- Organizing coding activities and sessions to improve problem-solving skills, and Mentoring members for coding competitions and skill development.

Mentor - Girl Script Summer of Code

October 2024 - November 2024

- Mentored contributors on backend technologies, guided to choosing the right tech stack for their project.
- Provided ongoing support to ensure smooth project execution, high-quality contributions to the codebase.
- Conducted code reviews, offered feedback, and helped troubleshoot technical issues.

PROJECTS

Nevo Code

Feb 2025 - Present

- Developed an educational platform offering in-depth guides on system design, DBMS, OS, and software engineering topics.
- Authored structured learning content to bridge the gap between theoretical concepts and real-world applications.
- Built and deployed a responsive web application on Vercel, ensuring high availability and seamless performance.
- Designed an intuitive UI for an improved learning experience and implemented a robust backend for dynamic content management.

Link: <https://nevocode.vercel.app/>

Technologies Used: Next.js, TypeScript, Node.js, Express.js, MongoDB, Vercel

GeoTrackr

June 2024 - October 2024

- Developed mobile and web application for tracking employee attendance.
- Implemented real-time location tracking, employee management, and attendance report preparation.
- Designed user friendly UI and implemented security protocols for protecting sensitive employee information.

Link: <https://github.com/prince-63/geotracker>

Technologies Used: React, TypeScript, Dart, Flutter, Node.js, Express, MongoDB

School Application

January 2024 - February 2024

- Implemented student record management platform, increasing efficiency in data organization and student record.
- Designed a database architecture, improved data retrieval speed for student details, courses.
- Implemented secure authentication, authorization, session management, cors protection, and csrf protection.
